

STATEMENT OF PURPOSE

RS18786

The purpose of this legislation is to exempt single family dwellings and multiple family dwelling buildings up to four units per building, from the requirements to install automatic fire sprinkler systems.

An identical exemption was added to the Idaho Code during the 2004 legislative session. But this exemption was tied to a particular 2000 edition of the International Building Code. the exemption expired when the 2006 International Fire Code language was superseded by the language of the 2000 International Building Code. This legislation would reinstitute the exemption while not linking it to any particular edition of the building codes.

FISCAL NOTE

There is no impact to the state's general fund.
